Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

Please note that claim 22 is drawn to a method, but depends on claim 16, which is a nutritional supplement. Correction is required. In the present restriction, claim 22 has been grouped with the method of Group I. However, the appropriate grouping will depend on the correction of the claim.

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, 9, 22 and 48, drawn to a method for producing a plant with significant concentrations of selenium in the edible portions, wherein the plant is incorporated into a processed food, classified in class 75, subclass 711, for example.
  - II. Claims 10 and 26-32, drawn to a method for producing a plant with significant concentrations of selenium, wherein the plant is incorporated into a chemotherapeutic agent, classified in class 75, subclass 712, for example.
  - III. Claim 11, drawn to a transgenic plant that accumulates selenium, classified in class 800, subclass 278, for example.
  - IV. Claims 12-15, drawn to a plant that has been induced to contain selenium, classified in class 75, subclass 710, for example.
  - V. Claims 16-21, drawn to a nutritional supplement, classified in class 800, subclass 295, for example.

Application/Control Number: 09/659, 926

Art Unit: 1638

- VI. Claims 23-25, drawn to a plant with chemopreventive selenium, classified in class 75, subclass 710, for example.
- VII. Claims 33-47 drawn to a method for producing transgenic plant that contain selenium, classified in class 435, subclass 69.1, for example.
- VIII. Claims 8 and 48, drawn to a method for providing a nutritional supplement, classified in class 47, subclass 58.1, for example.

Inventions I, II, VII and VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and they are not disclosed as capable of use together.

Inventions III, IV, V and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the four different inventions have been produced by four different methods and they are not disclosed as capable of use together.

2. Inventions I and IV; II and VI; VII and III; VIII and V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP

Page 4

Application/Control Number: 09/659, 926

Art Unit: 1638

§ 806.05(f)). In the instant case the plants of Inventions III, IV, and VI can be produced by methods different than that of Inventions I, II and VII respectively. The plants can be produced by breeding methods. The nutritional supplement of Invention V can be produced by a method different than that of Invention VIII which is a chemical biosynthesis.

- 3. Inventions III (and IV, VI) and V are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as phytoremediation and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, subject matter and the search required for each group is not required by any of the other group, restriction for examination purposes as indicated is proper.

Andrews & Printed Control

Art Unit: 1638

- Applicant is advised that the reply to this requirement to be complete must include an 5. election of the invention to be examined even though the requirement be traversed (37) CFR 1.143).
- Applicant is reminded that upon the cancellation of claims to a non-elected invention, the 6. inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- Papers relating to this application may be submitted to Technology Sector 1 by facsimile 7. transmission. Papers should be faxed to Crystal Mall 1, Art Unit 1638, using fax number (703) 308-4242. All Technology Sector 1 fax machines are available to receive transmissions 24 hrs/day, 7 days/wk. Please note that the faxing of such papers must conform with the Notice published in the Official Gazette, 1096 OG 30, (November 15, 1989).
